Special Measurement Instrument

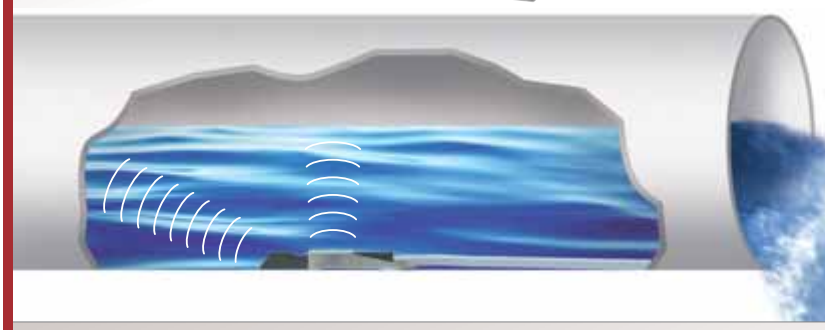

Ultrasonic Area-velocity Flow Meter

AVFM-II

A single sensor can measure both flow velocity & level.

No Flume or Weir required

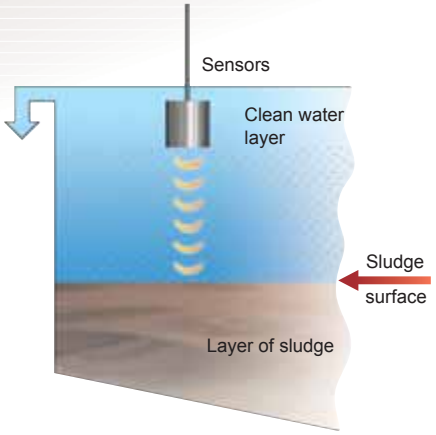

Ultrasonic Sludge Blanket Level Meter

ENV100

Can reliably measure submerged sludge-layer in a septic tank, thickner or the like.

Online Fluid Analyzing Sensor

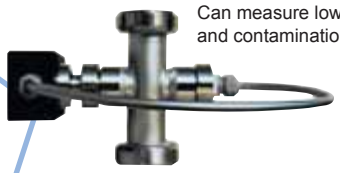

FluidScan-M

Can measure high solid concentrations and turbidity in liquids

FluidScan-F

Can measure low concentrations and contamination of fresh water

FluidScan-S

Can measure fat concentrations in milk/ liquids and detect composition of products.

On-Line Sensors for Accurate Liquid Analysis

FluidScan-R

Can measure dissolved solids / fluid concentration.

FluidScan-COD

Can analyze COD (Chemical Oxygen Demand) of waster waters.
