Vibration Monitoring made easy...

The NEW Vibcheck Vibration Meter

Try Vibcheck, the NEW Vibration Meter designed to ease the tasks of monitoring vibration levels around the factory.

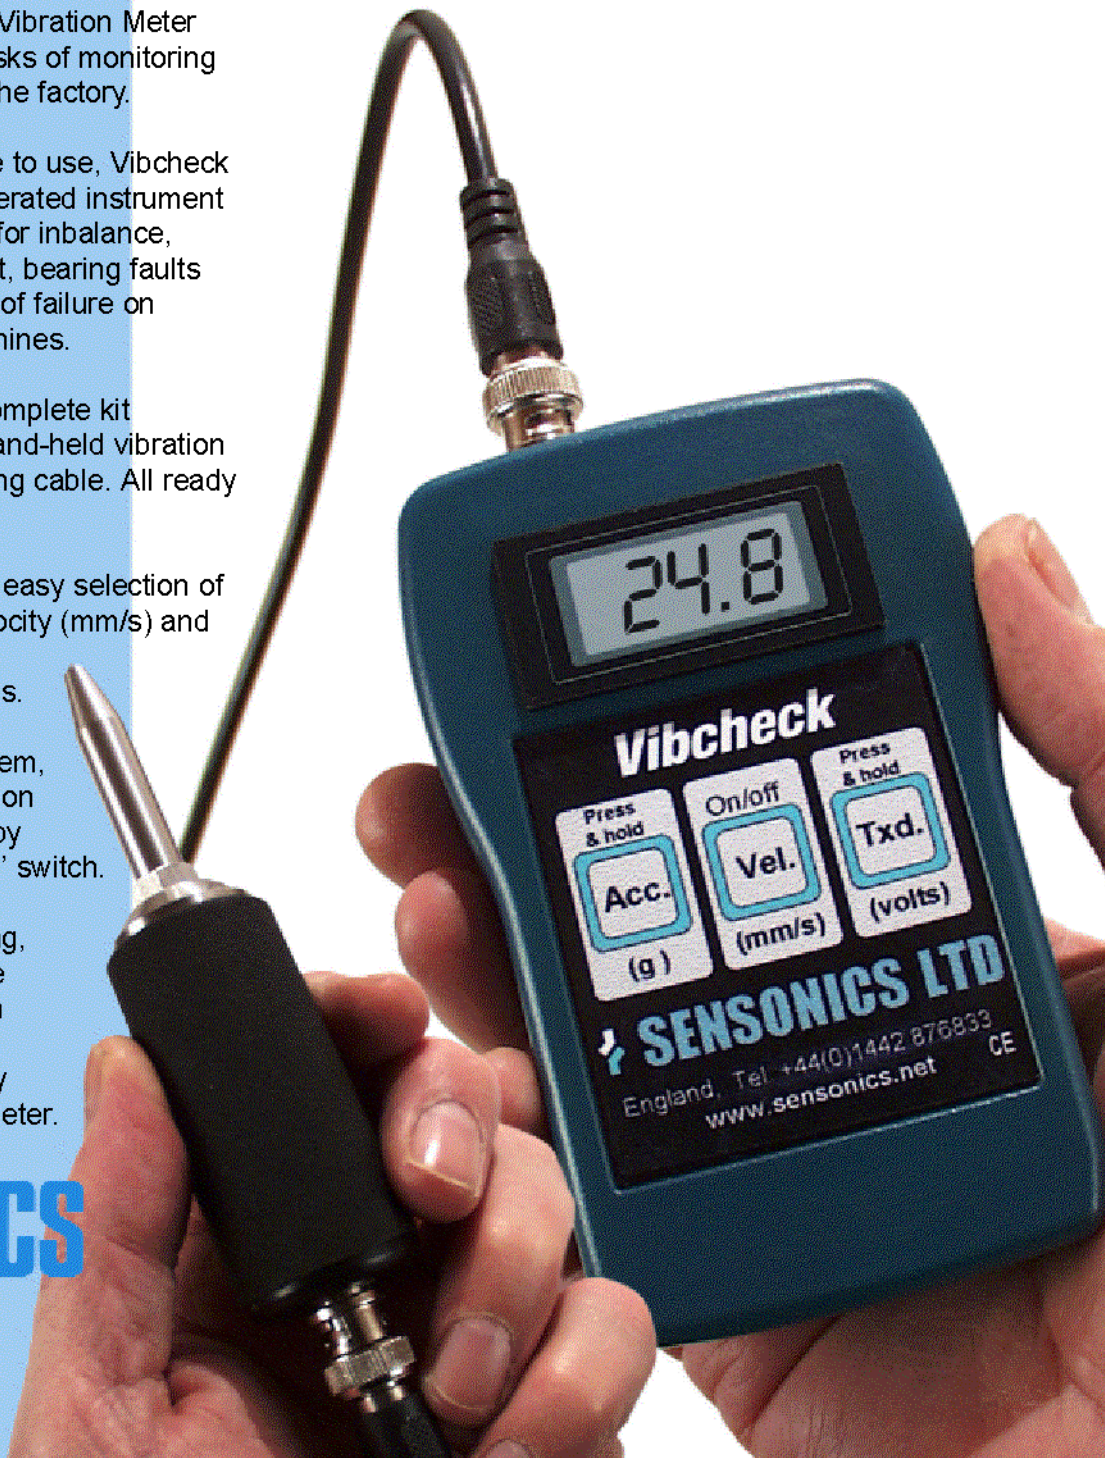

Pocket-sized and simple to use, Vibcheck is a portable, battery operated instrument ideal for checking plant for inbalance, looseness, misalignment, bearing faults and many more causes of failure on virtually all rotating machines.

Vibcheck comes as a complete kit including the meter, a hand-held vibration probe and interconnecting cable. All ready to go...

Tactile switches provide easy selection of acceleration (g) and velocity (mm/s) and the LCD digital display gives clear level readings.

Included, as a no cost item, is a built-in sensor function check facility, operated by simply pressing the 'Txd' switch.

For multi-point monitoring, vibration sensors can be permanently installed on several machines and periodic checks taken by simply plugging in the meter.
